## MULTILINGUAL UNICODE EXAMPLES

Oct 2015 – Dec 2015

- This is a **\BulletItem**.

This is an `\Item`, which has no bullet. Note the alignment with the `\BulletItem` above.

[16] This is a **\NumberedItem**. Note the alignment with the **\SubBulletItem** above.

[6] This is a **\NumberedItem** with a **\CharSpace** in its argument for padding shorter numbers. Note the alignment with the **\NumberedItem** above.

## Usage Notes

- **New Lines and Paragraphs**
  - To create a new line within the same paragraph (i.e., with the same indentation), use `\newline` instead of `\`. The latter will not work because it breaks the long table.
  - To create a new paragraph, use `\par` or simply leave an empty line. Paragraph indentations (from `\Item`, `\SubItem`, `\BulletItem`, `\SubBulletItem`, etc.) do not carry across different paragraphs.
- **Vertical Spacing Between Items**
  - Use `\Gap` or `\GapNoBreak` to insert a small vertical space between items within the same section.
  - Use `\BigGap` or `\BigGapNoBreak` to insert a bigger vertical space between items within the same section.
  - The “NoBreak” versions prevent page breaking.
- **Dates**
  - Use `\DatestampYMD{YYYY}{MM}{DD}`, `\DatestampYM{YYYY}{MM}`, and `\DatestampY{YYYY}` to specify dates.
  - Change the date format option passed to the document class to adjust how dates are displayed throughout the document: `MMMyyyy` (“Dec 2010”), `ddMMMyyyy` (“31 Dec 2010”), `MMMMMyyyy` (“December 2010”), `ddMMMMMyyyy` (“31 December 2010”), `yyyymmdd` (“2010-12-31”), `yyyymm` (“2010-12”), `yyyy` (“2010”).
